Fittings:

Cotton loops, knitted cuff, heavy duty design

Characteristics:

Comfortable to wear. Highly flexible and an excellent fit. Excellent protection thanks to the fabric structure (cotton loops).

Application:

Applicable for packing and sorting work with low risks as well as sensitive workpieces, e.g. in the craft trade, trade fair construction, packaging industry, logistics and much more.

Additional information regarding purpose, applications and risk assessment:

Please note that the actual conditions of use cannot be simulated and that the decision on the glove's suitability for its intended purpose therefore lies exclusively with the user. The manufacturer is not responsible for improper use. Hence, an assessment of the residual risk should be performed before use in order to determine whether this glove is suitable for its intended purpose.

These gloves belong to category 1 and are only suitable for use when exposed to minimal risks. This category only includes gloves that protect their user against:

- Mechanical activities with exclusively superficial implications (e.g. gardening gloves).
- Detergents with a weak or decreasing impact (e.g. gloves worn when using diluted detergent solutions).
- Dangers when handling hot substances that do not expose the user to temperatures above 50° Celsius, or hazardous substances.
- Atmospheric influences that are neither unusual nor extreme (seasonal clothing).
- Slight impact or vibration that does not affect the vital organs and whose implications will not cause irreparable damage.

These gloves must not be used for activities associated with more excessive stress or risks (e.g. caused by chemicals, thermal conditions or similar influences).

Markings on the gloves:

trademark, model no., size, CE icon, pictograms, i-mark, factory icon with month/year of manufacture

 These gloves are classified as personal protective equipment (PPE). The CE mark confirms that the product satisfies the applicable requirements of Regulation (EU) 2016/425.

 Reference to the manufacturer's information (Read the Manufacturer's Information).

 date of manufacture month/year: 00/0000

Dimensions/weights article:

| Size | Length in cm | Width in cm | Height in cm | Weight in g |
|------|--------------|-------------|--------------|-------------|
| 10 | 26,5 | 13 | 2 | 121 |

The above values are approximate and subject to slight variations.

Details of packaging unit:

| Size | kg gross | kg net | Length in cm | Width in cm | Height in cm |
|------|----------|--------|--------------|-------------|--------------|
| 10 | 20 | 18,5 | 60 | 31 | 41 |

The above values are approximate and subject to slight variations.

Hazardous ingredients - REACH (Registration, Evaluation, Authorization and Restriction of Chemicals):

The product is manufactured in accordance with Annex XVII of the European REACH Regulation 1907/2006 and contains no hazardous substances in concentrations requiring declaration.

Declaration of Conformity

 These gloves are classified as personal protective equipment (PPE). The CE mark confirms that the product satisfies the applicable requirements of Regulation (EU) 2016/425.

Identification and selection:

Selection of gloves must be made according to workplace requirements, type of hazard and relevant environmental conditions. The employer is responsible for choosing the right PSA. Therefore, it is necessary to check the suitability of the gloves for the needs needed before use.

Regulation for use:

The gloves fulfill the safety requirements only if they are worn completely correctly and in the best condition. Before using the gloves, check for any defects or faults. If cracks or holes occur while using the gloves, they must be disposed of immediately. Make sure the gloves are not too big or too small and fit exactly. Changes to the PPE are not allowed. Follow the instructions in the instructions for use and keep them for the entire operating time of the PPE. We assume no responsibility for possible damages and / or consequences that have arisen from improper use.

Washing Instructions:

Do not wash the gloves and do not bleach. Drying in tumbler is not possible. Do not iron. Professional dry and wet cleaning is not allowed.

Cleaning, care and disinfecting:

Both new and used gloves must be checked carefully for any damage before they are worn. Never store dirty gloves if they are intended for reuse. Users are advised to carefully remove the gloves on the right and then the left if it is not possible to remove the soiling or if doing so would present a danger. Here, use the hand wearing the glove in such a way that the other glove can be removed without coming into contact with the soiling.

Storage and aging:

Keep in a cool, dry place; do not expose to direct sunlight; keep away from any ignition sources; store in the original packaging if possible. The mechanical properties of the gloves will not change for a period of up to two years from the manufacturing date, provided they are stored as recommended. A precise service life cannot be stated, as it depends on the type of use and on whether the user ensures that the gloves are used exclusively for their intended purpose. The manufacturing date (month/year) is stated on the gloves.

Disposal:

Used gloves may be contaminated with environmentally harmful or hazardous substances. Dispose of the gloves in accordance with applicable local laws.

Health risks:

Allergies, caused by the proper use of the gloves, are not yet known. If an allergic reaction still occurs, consult a doctor or dermatologist.

First Aid:

If the gloves are contaminated with hazardous materials, remove the gloves.
 In case of skin contact: Contact a doctor immediately if an allergic reaction occurs.
 In case of eye contact: Wash out the affected eye with water. Consult a doctor immediately.
